ANMASI GROUP

At Anmasi Group, we are committed to meeting our customers needs with cutting-edge solutions. With our combined expertise, we optimize cleaning and recycling processes, ensuring high performance, reliability, and cost efficiency for our customers. Today, Anmasi Group consists of three specialized manufacturers - Anmasi A/S, Filco ApS, and Envotherm Solution A/S - along with our sales subsidiary in Germany and Sweden.

Precision cleaning by

ANMASI

Anmasi specializes in the development of ultrasonic cleaners and spray washers for industrial applications, backed by over 35 years of experience. Founded by Jan Hedeby Sørensen in 1989, the company has been dedicated to producing high-quality industrial washing and cleaning technologies. We have supplied machines to a wide range of industries, including aerospace, automotive, metal, food technology, and pharmaceuticals, ensuring effective and tailored cleaning solutions for each sector's unique needs.

Evaporation technology by

ENVOTHERM®

Envotherm delivers cost-effective and innovative wastewater treatment solutions, helping industries reduce disposal costs and improve resource efficiency. Our advanced heat exchanger technology recycles outgoing steam to preheat incoming wastewater, cutting energy consumption by up to 66%. With Zero Liquid Discharge (ZLD) technology, Envotherm minimizes waste while maximizing water recovery, allowing clean water to be reused in production without additional treatment.

Fluid filtration by

FILCO

Filco offers advanced filtration solutions for industrial process fluids, helping companies reduce costs, extend fluid life, and improve safety and environmental impact. Specializing in coolant and lubricant filtration for various industries and also provide oil separators, belt filters, skimmers, and complete filtration systems. Our solutions optimize fluid performance, saving time and resources while enhancing operational efficiency.

1986 — Jan joins Kärcher as Sales Manager for the Jylland region, Denmark.

1989 — The first prototype of the top-loading spray washer is ready at the farm where Jan grew up.

1992 — Jan is relocating from the farm to the production facilities in Vejle.

1993 — The first cleaning system is delivered to Danfoss, the largest industrial company in Denmark at the time.

1996 — Jan is constructing a new factory at a different location in Vejle, and production is expanding rapidly with exports to Germany and England.

1999 — The first sales branch is established in Cologne, Germany.

2007 — The product range expands to include ultrasonic cleaning.

2009 — 20th anniversary celebrated with agents from all over the world.

ANMASI SOLUTIONS

Anmasi's product portfolio includes ultrasonic cleaners, spray washers, alcohol washers and conveyor washers as well as customized washing systems with rotating baskets for complex cleaning tasks requiring exceptional cleanliness. Additionally, we specialize in ATEX-certified systems, ensuring safe operation in hazardous environments.

2012

Jan leaves his first company, taking the ultrasonic cleaning and chemical activities with him. Anmasi A/S is established in Grindsted, together with his eldest son, Anders.

2014

Anmasi A/S grows rapidly, and his second eldest son, Mathias, joins the company.

2015

The product range expands with the acquisition of Dansk Staalfilter Industry, which manufactures filtration systems.

2016

Anmasi establishes a German sales office in Wuppertal. Anders and Mathias become partners in the company.

2017

Anmasi receives its first Gazelle award, recognizing rapidly growing companies, and is ranked 25th out of 2,000 nominees in Denmark. At the same time, Anmasi acquires Compact Clean, a manufacturer of spray washing systems.

BØRSEN GAZELLE

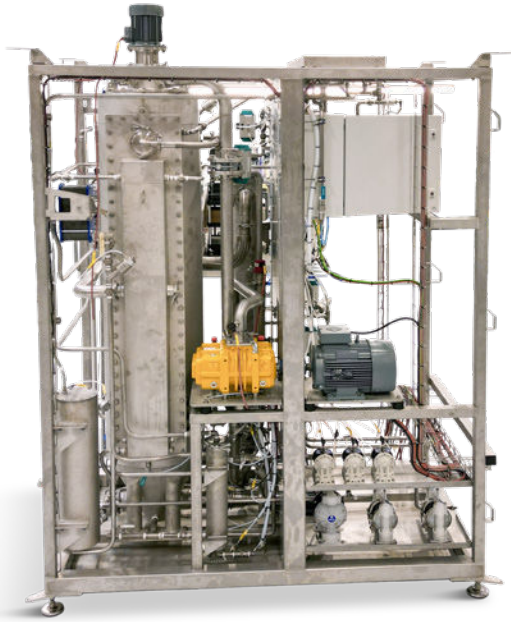
2018

New headquarters are established in Grindsted, and Anmasi begins exporting machines worldwide, with resellers in Germany, Romania, the Netherlands, and the United Kingdom.

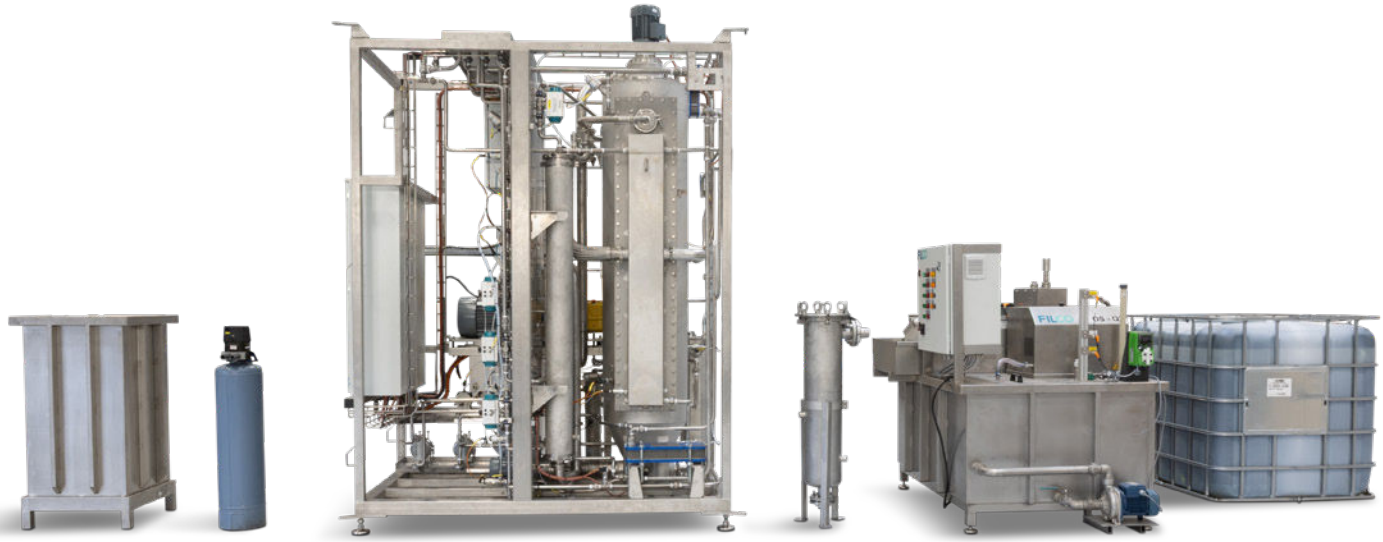
BØRSEN GAZELLE

ENVOTHERM SOLUTIONS

At Envotherm, we offer a wide range of plant solutions in various sizes, tailored to wastewater treatment needs. We assist in testing your process water to find the optimal solution. Additionally, they are versatile and scalable, making integration into existing facilities seamless while meeting your required capacity.



Envotherm ZLD



Complete Solution Setup

2019

The 30th anniversary marks a new era, with the company shifting focus to turnkey solutions as a one-stop shop for cleaning systems, filtration, and consumables.

BØRSEN GAZELLE

2020

Anmasi invests in its own laboratory for measuring technical cleanliness according to ISO 16232. This investment ensures the company can meet the growing market demand for cleanliness.

2021

Anmasi launches a new product line of wetblasters for cleaning and water polishing parts. The machines are produced at the facilities in Denmark and are particularly popular for service and maintenance applications.

2022

The growing demand for sustainable solutions leads to the acquisition of Envotherm, a well-known producer of vacuum evaporators for wastewater treatment. This investment supports the goal of becoming the preferred partner for environmentally friendly solutions in the industry.

2023

Anmasi obtains ISO 9001 certification in quality management and opens a sales office in Karlstad, Sweden.

2024

Anmasi invests in new production facilities at both Filco in Kjellerup and in Grindsted. This investment expands our operations to over 3,500 m² in Denmark, including offices and production.
