TOPLOADER ECO

This is our spray washing system which is highly efficient and economic, and includes a lot of standard equipment which makes it very attractive.

The ECO model of our standard spray washing system is produced in the same high quality as all of our spray washers

It has a more simple construction and includes several options to ensure the same cleaning results as our PRO models.

The spraywasher is available in three different size depending on the customer's needs.
It's offered exclusively with a washing function.

Available options

- Filtration system
- Automatic water filling
- Automatic chemical dosing
- Extraction fan
